Component Specification: Headliner Substrate

Part number **INT-HL-5001** | Revision **D** | Category: Headliner

Summary

The headliner substrate is molded from PET Fiber Composite and supplied by Ostrova Composites. The program target mass is 2.100 kg; the latest production-intent sample weighed 2.080 kg. Target piece cost was set at $15.50, and the current supplier quotation is $15.20 per piece.

Validation Testing

Flammability testing per FMVSS 302 measured a burn rate of 48 mm/min. Odor evaluation per VDA 270 resulted in a rating of 2.0. No other open test items are recorded for this revision.

Notes

Tooling is at the supplier. Color and grain match approved against the master sample.

Engineer approval: J. Patel, Interior Engineering, 2026-10-15
